

RADWAN DOUFAN

Tripoli, Libya • [linkedin.com/in/radwan-doufan](https://www.linkedin.com/in/radwan-doufan) • github.com/rdn91

EDUCATION

High School Diploma

Graduated: 2026

High School Academic Curriculum • **Final Cumulative Grade: 91%**

Tripoli, Libya

- Coursework focus: Advanced Mathematics, Physics, and Computer Science.
- Demonstrated strong academic rigor alongside self-directed engineering and software projects.

TECHNICAL & PRACTICAL PROJECTS

BLE Remote-Controlled Smart Vehicle

2026

Embedded Systems & Hardware Engineering • Arduino Uno R4 WiFi, BLE, Motor Shield, C++

- Engineered a dual-motor robotic vehicle driven by an Arduino Uno R4 WiFi with real-time Bluetooth Low Energy (BLE) control protocols.
- Implemented custom firmware for low-latency bidirectional telemetry, PWM motor regulation, and sound playback module integration.
- Designed robust power distribution circuitry and structural mounting for high-stress operational resilience.

Self-Hosted Infrastructure & Local Network Homelab

2026

Systems Administration & DevOps • Linux (Debian/Ubuntu), Docker, Nginx, Pi-hole, Samba, WireGuard

- Architected and deployed a multi-container home server environment on bare-metal hardware for local network services.
- Configured Pi-hole for network-wide DNS ad-blocking, Samba storage for automated backups, and Gitea for self-hosted Git version control.
- Implemented Nginx reverse proxy routing with SSL termination and established secure off-site mesh tunneling via WireGuard/Tailscale.

LEADERSHIP & COMMUNITY INVOLVEMENT

Active Member & Workshop Lead

2026

Hack Club

Tripoli, Libya

- Organized and hosted an interactive technical workshop teaching computer architecture, binary logic, and microcontroller prototyping to peers.
- Logged 10+ dedicated hours building hands-on technical projects directly within Hack Club sessions, supplemented by extensive independent build and research hours outside club meetings.
- Collaborated with fellow student makers, assisting with circuit assembly, sensor wiring, and basic Arduino programming.

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

McKinsey Forward Program

2026

McKinsey & Company • Digital Credential

- Completed professional development program covering structured problem solving, digital adaptability, effective communication, and resilience.

SKILLS & INTERESTS

Programming & Web: Python (Intermediate), HTML5, CSS3, JavaScript, C/C++ (Arduino), FastAPI, RESTful APIs, Git / GitHub.

Systems & Hardware: Linux (Debian, Ubuntu), Docker, Nginx, Embedded Systems (Arduino, ESP32, Raspberry Pi), Microcontroller Interfacing, Circuit Soldering & Hardware Diagnostics.

Professional Competencies: Continuous Learning & Rapid Skill Acquisition, Structured Problem Solving, Peer Mentorship & Technical Instruction, Adaptability.

Languages: Arabic (Native), English (Fluent - B2/C1), Spanish (Elementary - A1/A2).

Interests: Endurance Athletics & Running Progression, Home Server Architecture, Non-Fiction Literature (Psychology & Behavioral Economics).
